Firmware Release Notes

MiniTT1® / FlexTT5® for Canon

MiniTT1 Firmware Upgrade to version 6.200

FlexTT5 Firmware Upgrade to version 6.200

340.00 - 354.00 MHz, FCC/IC

433.42 - 434.42 MHz, CE

MiniTT1/FlexTT5 for Canon ControlTL® Firmware 6.200 Overview

Intro: MiniTT1/FlexTT5 for Canon ControlTL firmware version 6.200 addresses some improvements we have made since the launch of Canon ControlTL firmware version 6.150.

IMPORTANT:

This new firmware requires that you use PocketWizard Utility version 1.54 or later. It is available for download [here](#). Upgrade to the latest Utility first, then upgrade your radios' firmware.

When updating firmware, be sure to update all of your Canon radios to the latest version, 6.200. Your radios will only operate as expected when all units are using the latest firmware.

Note: Previously used settings or saved profiles cannot be automatically reloaded after installing the new 6.200 firmware. Make sure to copy down any important settings before loading the firmware because the PocketWizard Utility will perform a factory reset once the installation is complete.

PocketWizard Utility and Factory Reset Note: Always perform a factory reset after updating your firmware. The PocketWizard Utility performs a factory reset automatically when you upgrade the firmware. It also has a Factory Reset button on the Update tab which additionally simplifies factory reset. You can also perform a Factory Reset with the radio: See RESET B [here](#), or simply hold TEST before you power on your radio and continue to hold TEST for 10 seconds until you see 4 blinks (green).

Learn More: Visit the PocketWizard Wiki for more information on using your radios.

New Key Feature:

Compatibility with Canon EOS 5D Mark III:

The following new Canon gear is supported in this firmware release:

- Canon EOS 5D Mark III

This equipment will work in the ControlTL® system similarly to previous Canon equipment.

Please review the general Canon Compatibility section of the PocketWizard Wiki.

Canon EOS-1D and Rebel T4i are not supported

- This firmware does not provide support for the Canon EOS-1D X or Rebel T4i.
- As of this date, the Canon EOS-1D X is being reverse engineered and is our next firmware priority. Learn more about our firmware development plan here:
