## Beta Software Release Bulletin

March 10th, 2020

### **PocketWizard Utility Beta Software**

Beta Firmware Version: 2.12 for MacOS 10.15 Catalina and earlier

**Intro:** Beta Software Version 2.12 includes some improvements we have made since the launch of PocketWizard Utility version 2.10.

**Please report any problems with this beta version to [betalab@pocketwizard.com](mailto:betalab@pocketwizard.com).**

Learn More:

Visit the [PocketWizard Wiki](#) for more information on using your radios.

### **New Key Features:**

#### **Compatibility with MacOS Catalina:**

This new version of the PocketWizard Utility has been updated to 64 bit and can be installed on computers using MacOS 10.15 Catalina.

#### **Known Issues:**

- Infrequently when using a Plus III with this Utility version a dialog box will pop up asking you to enter the serial number for the radio. This box can be ignored and closed out.
- When updating the firmware on a CE PowerMC2 the progress bars can get stuck resulting in the radio not properly updating. Simply unplug the radio and try updating the firmware again.
